

Weight Comparison Chart

Bond Ledger	Book	Kraft Tag, News	MM Factor	Approx. Caliper																																																															
17 x 22	25 x 38	24 x 36			<p>This chart is particularly useful for comparing the actual weights of sheets to determine the best sheet for a job or for a possible substitution. For example 90 lb. index is exactly the same weight as 100 lb. tag but about 10% heavier than 100 lb. book.</p> <p>MM Factor is the weight of 1000 sheets 1000 square inches in size (1000 sh. 25" x 40").</p> <p>To find the weight of 1000 pieces of any size sheet simply multiply its MM Factor by the square inches and move the decimal three places to the left.</p> <table border="1" style="width: 100%; border-collapse: collapse; margin-top: 10px;"> <thead> <tr> <th>Cover</th> <th>Bristol</th> <th>Index</th> </tr> </thead> <tbody> <tr> <td>20 x 26</td> <td>22½ x 28½</td> <td>25½ x 30½</td> </tr> <tr> <td colspan="3" style="text-align: center;">Wt. 500 Sh.
